Professor Jameson
Octobes 1826

Jameson Jameson

My Dear Sir

I send the article
Comet 2 the German — Encyclopa-
ia not yet published — and the
article Comet promised by Professor
Brandes in the new Edition of
Gehler's Phy. Wörterbuch in
response to another article —
I send you the last volume of
Brandes Art Letters — Many
just left it from Hamburgh I
do not know I contain
any work of mine on Jame-
subject

subject. If any thing interesting occurs soon I shall write it out with me as I shall not have a frank to hand the pleasure of spending a few days at Milne Graden. I am now printing for my next number the 8th Journal a part of the Tails of Comets —

It Appeared to most resemble the Point of the Tusk of a Wolf of any we compared it with; but was too small & imperfectly exposed to admit of any thing like certainty. Dr. Walter Adam took charge of its return. It was imbedded in an excessively hard red sand-stone.

My Dear Sir

Your Kindness in sparing the fossil bones from New Holland induces me to trouble you again with a Spaniel carrying an animal unaw- My friend the zeologist Dr. Hardie will deliver the specimen & has promised after you have delivered your Memoir as to the tooth it contains to see it delivered to Dr. Adam of Edinr. Brother in Law to Dr Prout at present in London— Kindly you will pardon me again draw on your time I remain

My Dear Sir

College—Edinburgh
June. 29th. 1833.

Yours very sincerely
Robert Jameson
